

Along with our other Recon flow monitoring and Engage section control solutions, Intelligent Ag is a proud advocate of 4R Nutrient Stewardship management practices. In particular, the Recon Blockage Plus provides critical flow information so the operator can apply seed and fertilizer at the Right Rate in the Right Place. Users enjoy an incredible amount of information about their entire air seeder and can identify large and small variations in flow performance. You can learn more about 4R Nutrient Stewardship at <https://nutrientstewardship.org/>

#### RIGHT PLACE

Keeps nutrients where crops can use them.

#### RIGHT TIME

Makes nutrients available when crops need them.

#### RIGHT SOURCE

Matches fertilizer type to crop needs.

#### RIGHT RATE

Matches amount of fertilizer to crop needs.
